

Eckosil

ACTION:

ECKOSIL is a product that offers Silicon, giving the plant two entirely different purposes, nutrient absorption regulation and mechanical protection against external aggressions.

By its own nature ECKOSIL has the property to absorb surface moisture from plants, increasing plant resistance to various abiotic stress, such as high and low temperatures, drought, wind and high concentrations of harmful salts.

COMPOSITION:

Silicon (Si) 11,75g/Kg 13,86g/L
Silicon Dioxide (SiO₂) 25g/Kg 29,5g/L

CROPS:

Recommended for all vegetable crops, vineyards, orchards, olive and cereal.

APPLICATION PROCEDURE:

Foliar:

30-50ml/100L of water, performing various applications in the moments of greatest physiological requirement.

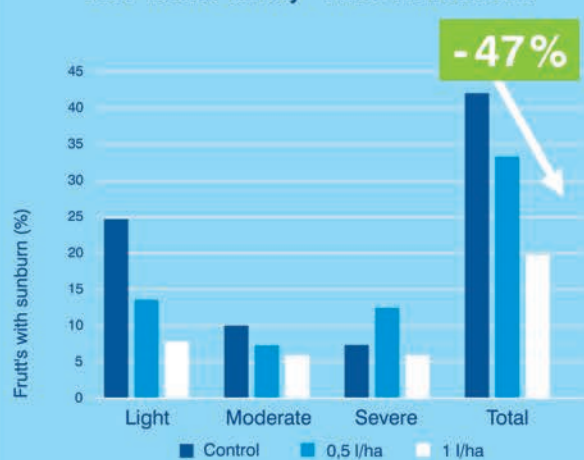

Fertigation:

0,5l-1 l/ha. performing various applications in the moments of greatest physiological requirement.

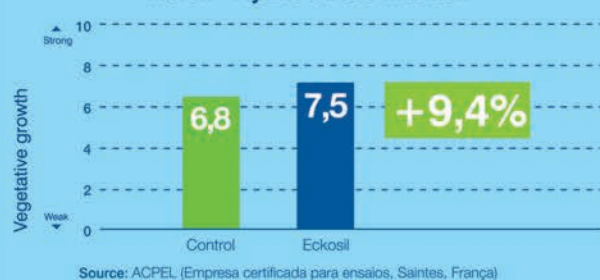

Eckosil Application Benefits

Pear "Rocha" variety – Fruits with sunburn

Melon - Hydric stress inhibition

Product for use in organic farming under the council regulation (EC) No. 834/2007 of 28 June 2007, on production and labelling of organic products.

Available in packs of : 0,5 L, 1 L e 5L.
