

# TRACETOP

Tracetop is a vitamin and mineral bolus with slow-release technology that releases its nutrients over 6 months to improve the growth and well-being of adult cattle.

## Deficiencies

Insufficient trace minerals and vitamins can result in losses in performance and can cause clinical deficiencies. More commonly though, sub-clinical deficiencies occur manifested as reduced pregnancy rates, rough hair coats, hoof issues, retained placenta, low libido and poor calf performance. Supplemented cows will develop a higher resistance against diseases and gain more weight. Tracetop is a practical solution that releases a daily amount of minerals and vitamins during 6 months, and in this way we want to change farming into Stressless Farming.

## Average daily supply

I Iodine 16.9 mg	Se Selenium 3.2 mg	E Vitamin E 11.7 mg
Cobalt 2.8 mg Co	Zinc 167.7 mg Zn	Vitamin A 3 066.7 IU A
Cu Copper 83.5 mg	Mn Manganese 20.7 mg	D Vitamin D3 600 IU

**LONG-TERM SUPPLY  
OF TRACE ELEMENTS  
AND VITAMINS**

**PREVENTS  
AND SOLVES  
DEFICIENCIES**

**BETTER  
GROWTH**

**FEWER HEALTH  
PROBLEMS**

**6 MONTH  
SLOW-RELEASE**

**FROM +/- 1 YEAR  
OF AGE**

# TRACETOP

## Benefits

**INCREASES  
ANIMAL HEALTH**

**INCREASES  
REVENUE**

**REDUCES  
MEDICAL COSTS**

## When to use

- ▶ Dairy cattle: 1 bolus every 6 months.
- ▶ Suckler cows and Youngstock above 250 kg: 1 bolus when putting out to graze and 1 bolus when stabling (or 1 bolus every 6 months)

## Why a bolus?

1. Easy to use
2. Cow absorbs all the nutrients she needs
3. Each cow gets the right dose
4. No need to give daily supplements
5. No need to calculate supplementary feed
6. You don't have to rely on the cow's appetite
7. Easy storage and transportation
8. No spilling

**ONE BOLUS  
6 MONTHS  
NO WORRIES**
